## **SunCorp Upgrades Rates Pages on Website**

**Denver, CO** – SunCorp Corporate Credit Union has upgraded the most viewed section of its website: the Rates pages. Credit unions visit these pages daily to check SunCorp’s rates on investments, loans, certificates of deposit, and more.

The new, improved Rates pages will be launched on Monday, March 6. The new web pages will feature an easier to navigate design, better organization, and an upgraded appearance.

In addition to changing the look and feel of these popular web pages, in April SunCorp will be launching “SunCerts Online.” This new service will allow credit unions to purchase share certificates and structured certificates online, saving time and allowing credit unions to lock in rates as they change throughout the day.

To view the upgraded Rates page, please visit [www.suncorp.coop](http://www.suncorp.coop).

SunCorp is one of the top ten corporate credit unions in the nation, providing financial services to credit unions and Credit Union Service Organizations in 20 states. SunCorp operates three Regional Offices, in Denver, Salt Lake City and Omaha.
